Friday, March 6, 2026

8:30 am - 5:00 pm

Lubbock Memorial

**Arboretum 4111 University
Avenue Lubbock, TX 79424**

\$125

This eight-hour course covers how to:

1. Evaluate and document site conditions that influence the efficiency of landscape irrigation,
2. Troubleshoot irrigation system components for proper operation,
3. Perform routine maintenance and minor repair/adjustments of irrigation systems to improve performance
4. Determine station precipitation rate, and
5. Develop seasonal irrigation schedules that address site limitations, plant water needs, and irrigation system performance.
